

# Parallel Programming

## Introduction

Prof. Paolo Bientinesi

HPAC, RWTH Aachen  
`pauldj@aices.rwth-aachen.de`

WS17/18

## Why Parallel Computing?

- Problems that cannot be solved fast enough sequentially
  - Real-time constraints
  - Large data sets
  - Accuracy requirements

## Why Parallel Computing?

- Problems that cannot be solved fast enough sequentially
  - Real-time constraints
  - Large data sets
  - Accuracy requirements
- Main idea
  - Decompose large problems into subproblems ...
  - ... that can be solved concurrently

- Genome analysis
- Drug development
- Materials science
- Weather forecast
- Climate

## Engineering

- Engine design
- Aerodynamics
- Fluid dynamics
- Crash simulations

## Finance

- Economics
- High-Frequency Trading

- List of the 500 fastest supercomputers in the world
- Twice per year (ISC, June, Germany. SC, November, USA)
- Computers ranked based on the LINPACK benchmark
  - Solution of linear system of equations:  $Ax = b$
  - Result measured in FLOPS/s<sup>1</sup> (in double precision)
- Established in 1993: 60 GFlop/s
- Latest, June 2017: 93,000,000 GFlop/s

---

<sup>1</sup>Floating Point Operations per Second

# Examples of supercomputers

---

## Sunway TaihuLight.

Source: top500.org

### Sunway TaihuLight (Rank #1)

- Site: National Supercomputing Center in Wuxi, China
- 40,960 SW26010 processors, each
  - 256 processing cores
  - 4 auxiliary cores
- 10,649,600 cores
- 1,310,720 GB RAM
- 93,014.6 TFlop/s (125,435.9 TFlop/s)
- 15,371 kW

# Examples of supercomputers

## Hazel Hen.

Source: hlrs.de

### Hazel Hen (Rank #8 - Nov. 15)

- Site: HLRS - Höchstleistungsrechenzentrum Stuttgart
- 7,712 compute nodes
  - 2 Haswell 12-core CPUs
- 185,088 cores
- 987,136 GBs RAM
- 5,640.17 TFlop/s (7,403.52 TFlop/s)
- ~3200 kW

# So...

---

are parallel computers restricted to supercomputing?

# So...

---

are parallel computers restricted to supercomputing?

Not at all!!

# Parallel Computers are everywhere!

---

# Summarizing

---

- Parallel programming is critical in science and engineering
- Not only supercomputers, but in every workstation/laptop
  - Parallel computers are here to stay
  - The burden is and will be on the programmer
  - Let's roll up our sleeves and do our best :-)
